KEEP YOUR TRUCKS ON THE MOVE!

Cost Effective Front-End Protection for **Straight Truck Fleets.**

EX-100 G3 GUARDS

PROTECT YOUR BUMPER. PROTECT YOUR BOTTOM LINE.

Damage Costs More Than a Repair.

A damaged bumper or CMS radar can mean more than a repair bill. It can mean vehicle downtime, lost productivity, expensive parts and repeated damage—all of which add up quickly.

Bumpers and radar systems are vulnerable to everyday impacts from parking, loading docks, road debris and normal fleet operations. Even low-speed impacts can lead to costly repairs and keep trucks off the road.

PREVENT DAMAGE. REDUCE DOWNTIME.

The Ex-Guard® **EX-100G3** provides a smarter approach to fleet protection. Designed for a custom fit, it helps protect critical bumper and radar components from everyday impacts—before damage can occur.

THE RESULT:

- Fewer costly bumper and radar repairs
- Less vehicle downtime
- Longer vehicle life
- Fewer parts and repair delays
- Improved protection for drivers and equipment
- Greater fleet productivity and profitability

PROTECTION THAT PAYS FOR ITSELF

Don't budget for repeated damage. **Prevent it.**

Ex-Guard® helps fleets protect their trucks, reduce downtime and keep their business moving.

BUILT TO WITHSTAND A COLLISION & KEEP YOU TRUCKING!

Shield your trucks from damage and downtime with Ex-Guard. Our guards are constructed of extremely strong high-tensile steel. Their continuous design is bent and shaped into position providing fewer points of welding. Then they are finished with a 1/8" thick corrosion and chip resistant **EVRCoat™ Ultra Coating**, making them virtually maintenance free. Ex-Guard will protect your trucks for years to come!
